25X1X

On 9 March 1953, source observed that surveying was under way east of the Elsterwerda-Doberlug railroad line, in line with the village of Rueckersdorf, as far as the area northwest of Deutsch Sornow. The surveyed terrain was about 6 km long and about 2.5 km wide. It was staked off by red-white pegs. On a day after 15 March, the area was inspected by three air force officers who left on sedan . The driver of the vehicle wore civilian clothes. No construction work was observed in the surveyed terrain.

25X1

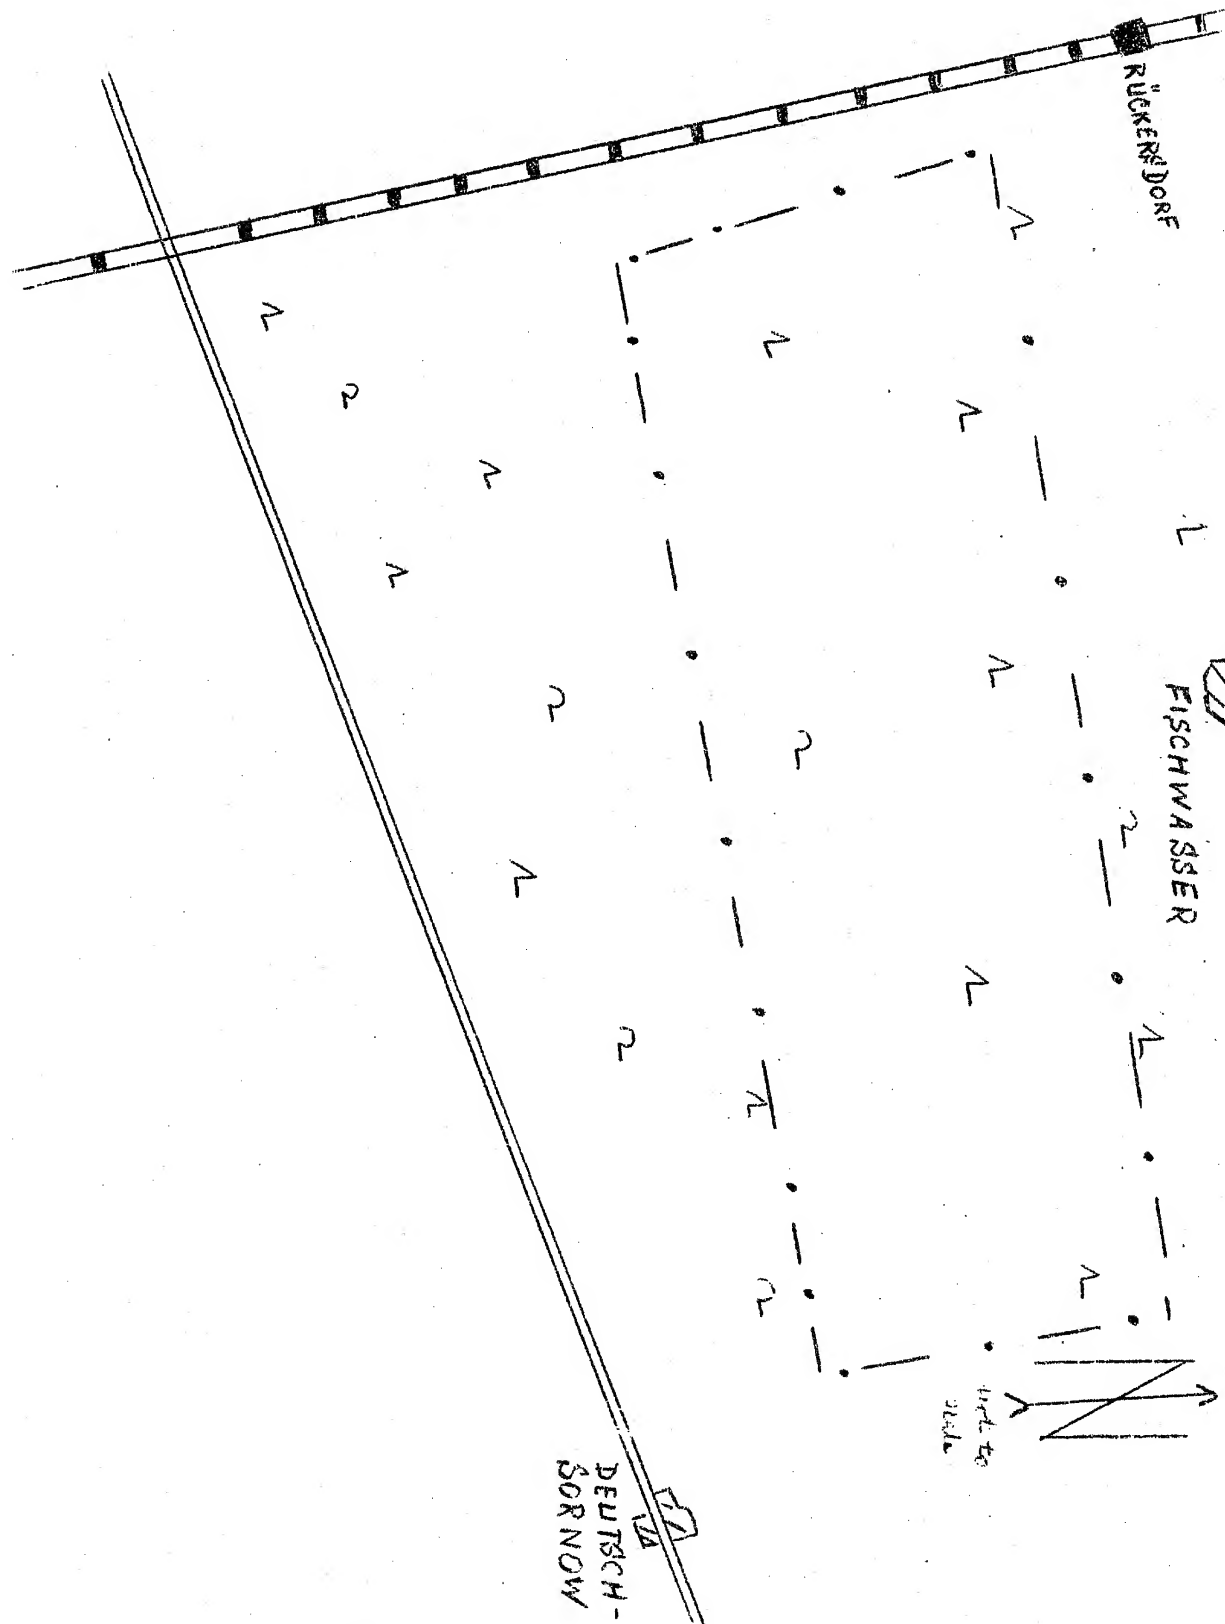

25X1A

 Comment. The surveyed area is about 7 km southwest of Finsterwalde. For sketch of terrain, see Annex. As the terrain is located close to the Finsterwalde airfield it appears doubtful whether an airfield is to be constructed there.
